

Business Summary:

Titan LED is a California based Fortune 500 Manufacturer and OEM specializing in Energy Efficiency and Clean Tech LED lighting solutions. We offer a broad range of American made, proprietary, and cutting edge products designed to install and retrofit a variety of existing infrastructures which include; Warehouses, Schools, Hospitals, Offices, Municipalities, Churches, Service Stations, Parking Lots & more. In stark contrast to other manufacturers that have taken their operations "off shore" to save on production costs, Titan LED is committed to putting Americans back to work and building a company that relies on American ingenuity and labor. We manufacture our lights using the most innovative technologies and engineering available in the LED space and we pioneer that innovation in-house.

Capabilities

- Full Solutions Lighting Provider
- American Made Products
- High Performance and Commercial Grade
- Six Sigma Standards
- Inherent Scalability for High Volume Needs
- Custom Design Build
- Photometric Support and Lighting Design Layout
- General Service Administration Approved
- US Dept. of Veterans Admin. Construction & Facilities Approved
- TAA Compliant (19 U.S.C. 2501, et seq.)
- Buy American Act Compliant (FAR Subpart 25.2)

Facilities and Equipment:

Located at 4590 Ish Drive in Simi Valley, CA Titan LED operates from four large warehouses, along with a 30,000 sq. ft. manufacturing facility in Simi Valley which can populate, build, and assemble our products. Unique stations are used and designed to efficiently exam & test multiple units for various results and quality control. A Hi Pot testing area (with reporting) is needed to meet UL requirements for example. Titan LED circuit boards are manufactured in an ISO 9001:2008-ITAR Compliant-AS9100 Rev C Certified environment and populated by the Hitachi GS chip shooter, then baked in a 13-Zone reflow Oven. Solder paste measurements are carried out by the TEMPRON machine and checked thoroughly by the FAXITRON X-Ray system for any microscopic imperfections.

Materials & Design - Hennessy Series:

Titan LED's material is chosen according to its quality and performance such as:

- Luxeon Lumileds Tier One Chips
- Solid Aluminum Circuit Boards
- Single Piece Extruded Aluminum Heat Sinks
- Poly Carbonate Lensing
- 6063 Powered Coated Aluminum Housing
- State of the Art Smart Dimmable Drivers rated IP67 and equipped with quick connectors
- ACC Technology - Patent Pending Thermal Management to cool both drivers and chips

engineering staff is headed by Electronics Engineer, Mr. Kevin Sanders. With over 35 years of electronics experience, Kevin is an electronics engineering expert and oversees all aspects of electrical components contained in Titan LED products. Mr. Brian Brown is Titan LED's on staff Mechanical Engineer with more than 20 years of expertise. Brian is proficient in 3D mechanical drafting design utilizing renowned software such as SolidWorks. This allows Titan LED to bring thoughts and designs quickly into a tangible reality. Photometry engineering is headed by Mr. Mark Hennessy and allows customers to see detailed light levels before making a lighting purchase. Industry standard AGI32 software is used to perform these lighting layout calculations.

Finally, President & Founder of Titan LED Inc., Brian Hennessy, has an impressive background of achievement and proactive leadership. With over two decades of experience in Sales & Marketing, Brian has demonstrated the ability to successfully build organizations with great proficiency, knowledge and vision. To his credit, recent business models consisted of 51 Regional Offices, 6,000 independent agents and generation of over 1 billion in sales. This proven track record is held together by exceptional relationship skills and the capability of piloting several companies through multiple business phases such as; start up, survival, turnaround, and growth. He continues to spark enthusiasm and to embark Titan LED on the path of innovation and success while preserving quality, service and competitiveness.
